Other Modality Options called the PHIT Modalities are available for the System. Please see the PHIT Head Modality Summary.

**Two-year warranty on the base unit and one-year warranty on the therapy heads.**

*"We use LET in management of edema, secondary to surgery or radiation, but it's also good for peripheral neuropathy and fatigue. It's great as a part of general detox programs. It's a regulator of the autonomic nervous system, so sympathetic-dominant people really benefit. It helps people feel cleaner, better and less stressed. We don't see it as panacea, but it's an excellent therapy that's not about giving pills."*
